

## Higher Education Quality Surveys

**Higher Education Quality Surveys** are systematically developed tools, administered annually, to capture the perspectives of various stakeholders. They serve to identify strengths and areas for improvement, support continuous development of educational inputs, processes, and outputs, enhance the academic environment, and align higher educational outcomes with labor market needs, in accordance with the objectives of Saudi Vision 2030.

### General Objectives

**Gather comprehensive** data to deepen understanding and reinforce the connection between higher education and employers

**Effectively prepare** students for the labor market, thereby increasing their employability

**Inspire** practical insights and strategies for improving curricula, teaching methods, and skills development programs.

**Contribute** to the Kingdom's economic and social development.
